Crystal Beige
G101 [12 mm]

Allspice Quartz
G63 [12/9 mm]

Volcanics

Granite, Quartz, Sand & Pearl

Environmental through and through

LG Hausys has launched the most environmentally-friendly mineral material onto the market: HI-MACS® Eden consists of up to 41 % recycled material. Additionally, the company regularly examines and publishes its performance in terms of environmental conservation and energy consumption.

The basic HI-MACS® material is identical for every colour, although darker hues have a higher percentage of natural pigments, which need more careful care and attention. Colours indicated with a * are more suitable for surfaces which are subject to less wear and tear and are therefore used more often for contrasts or inlay work. There may be some slight variation in colour between the illustrated and actual colours due to printing techniques.

LG Hausys

THE NEW GENERATION. Inspired by Architecture.

HI-MACS®

Natural Acrylic Stone™

THE MATERIAL FOR STRIKING ARCHITECTURE.

Irrespective of whether you are working on integrated design concepts or a complex interior design, HI-MACS® - manufactured from acrylic, natural minerals and pigments - provides architects and designers, as well as craftsmen, with complete freedom of design.

Advanced technology.

HI-MACS® is manufactured in a modern production process and is heated to a high temperature using advanced technology. It is this process that sets HI-MACS® apart from other materials and produces a denser, more uniform and robust surface. The 15 year guarantee which is unique in the market further emphasises the outstanding quality of the product.

Outstanding properties.

HI-MACS® is worked with the same way as wood but provides a number of advantages over conventional materials: the material can be thermoplastically moulded, is available in an almost unlimited range of colours and has translucent properties. A further reason to choose HI-MACS® is the visually seamless processing of the material and its non-porous, easy-to-clean quality that guarantees perfect hygiene.

Extensive range.

HI-MACS® sinks and washbasins are produced in a superior casting process. The range is extensive and offers creative designers with every option they could wish for to create sophisticated bathrooms, kitchens, hospitals and much more.
